- Website editing
- Template editing
- Content Management
- Team playing
- More...

What I love doing Includes;

- Watching movies
- Playing Video games
- Coding & traveling
- Talking about myself

Who I Am...

As a versatile web developer, I possess a diverse skill set that encompasses front-end and junior full-stack development, with a strong focus on ReactJS. Hailing from Cameroon, I graduated from the Giddis Computer Training Center, where I excelled in web design and development. During my two-month internship, I demonstrated the ability to thrive in challenging environments and a strong aptitude for learning.

In addition to my technical expertise, I have earned certificates in public speaking, leadership and empowerment, and web design. I am passionate about remote work and open to full-time opportunities that allow me to travel. My online portfolio, accessible at <https://fongang-fonju-fullstack-protolio.netlify.app/> provides a comprehensive overview of my qualifications and achievements.

How I acquired 2years of experience

23-07-2023 > 24-08-2023

**Web design & development internship
At HighUp Web**

During my internship, I enjoyed collaborating with the team, even though they primarily used WordPress. I was given opportunities to edit existing websites for clients. I learned to work with people of diverse backgrounds and personalities, mastering the basics of graphic design, from creating logos and flyers to photo editing. This was a fulfilling first professional experience.

30-07-2023 > 16-08-2023

**Web developer internship
At HighUp Web**

I expanded my skillset by independently learning React.js, Next.js, Sanity, Firebase, and more through YouTube, W3Schools, CodePen, and Stack Overflow. You can view some of these projects on my portfolio.

My Educational Background

After obtaining my primary school certificate in 2010, I went on to earn a CAP (Certificat d'Aptitude Professionnelle) in 2014/2016, followed by an Intermediate Technical Certificate (ITC) in 2018/2019 and an Advanced Technical Certificate (ATC) in 2019/2020. In 2021, I completed a 6-month training program in web design and development at the Giddis Computer Training Center in Yaoundé. Currently, I am a student at the ICT University of Yaoundé, Cameroon. Below are some of my achievements. Attached to this document are scanned copies of my certificates

My Achievements

- Certificat d'Aptitude Professionnelle (CAP)
- Intermediate technical certificate (ITC)
- Advance Technical certificate (ATC)
- Web design & development certificate
- Leadership & empowerment certificate
- Public Speaking certificate
- Internship attestation and certificate
- Internship attestation and certificate
